Jamie and Steve,

It was a pleasure meeting you both yesterday. Thank you again for hosting us. It is very important to us to understand the viewpoints of Kalamazoo community members and we appreciate all of the feedback that we received. We will be sure to update our website and associated materials to reflect the missing information that we discussed yesterday.

We are following up on two items remaining open from our discussion yesterday:

- Chris asked yesterday for the contact information for the State of California representative for the site listed on our website. We have reached out to the contact listed on the No Further Action letter to confirm if he is the appropriate person. We will be in touch as soon as we hear back.
- We have confirmed with our lab that our products do not have any genetic manipulation.

I have attached two documents to this email: one summarizes our request for the Watershed Council's support for increased flexibility to the language currently included in the EPA's proposed plan. The request includes a summary of the benefits of our solution, including the benefit to Kalamazoo of hiring local labor. The second document is a template that the Council can modify to reflect the Council's response to the EPA's public comment period.

Please contact me if there are any further questions and we look forward to seeing Council members at the November 19th EPA meeting.

Thank you again,  
Anne
